

Round Bottom Liners

Our Round Bottom Liners are the simplest way of protecting your products in storage and transit in all types of containers.

Custom designed Round Bottom Liner's can be manufactured with diameters ranging from 100mm to 1400mm with capacities from 10 litres to 1,000 litres. The standing height and the thickness of the liner material depends on the requirements of the product contained in the drum while the type of material selected is dependent on the characteristics of the product.

Benefits:

- Can be used in all types of containers
- Highly cost effective
- EU & USA food approved materials available
- Heights are optional to suit sealing technique
- Makes single trip containers multi trip

Materials:

- Stan-O-Nit: Standard LDPE, food grade
- Stat-O-Nit: As above, anti static $10^8\Omega$ and $10^{11}\Omega$ this reduces the build up of static, improving safety
- Ex-O-Nit: Black, conductive
- Barr-O-Nit: Aluminium tri-laminate
- Res-O-Nit: Hot-fill up to 180°C and strong chemical resistance
- Other materials available on request
